PROFESSIONAL SUMMARY

I'm a mobile and fullstack developer with 8+ years in tech, specialized in React Native and TypeScript. I've built and maintained apps with 100,000+ users on iOS and Android, along with the Node.js/PostgreSQL APIs and React dashboards behind them. I own features end to end — from the API to the store release — and have led and mentored a small team.

PROFESSIONAL EXPERIENCE

Mobile & Fullstack Developer

Mouts

Nov 2021 - Apr 2026

- Built and maintained a React Native app with 100,000+ users on iOS and Android, an admin dashboard in React.js, and a Node.js/Express API on PostgreSQL.
- Managed app distribution and releases on the App Store and Google Play.
- Migrated projects to TypeScript and added automated tests, improving codebase reliability.
- Implemented CI/CD with Docker, Docker Compose, and GitHub Actions, standardizing development and deployment environments.
- Introduced Swagger API documentation and Redis caching, improving integration and performance.

Mobile & Fullstack Developer

Field Control

Jun 2021 - Nov 2021

- Worked on JavaScript microservices, all with CI/CD and automated testing.
- Developed with Angular, AngularJS, ReactJS, Ionic, Express, and Serverless Framework.
- Consistent code review, pair programming, and a strong testing culture.
- Led internal presentations on functional programming and Node.js streams.

Mobile & Fullstack Developer

Rency Digital

Jun 2020 - Jun 2021

- Led and took part in the full development cycle of apps across delivery, education, auto parts, and condominium management.
- Built a whitelabel delivery app from scratch in React Native and a standardized starter template for new projects.
- Built APIs with NestJS, real-time communication with socket.io, and Redis caching, plus a Next.js website.
- Led a team of two interns and one backend developer, providing mentorship and guidance.
